DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 1. Claims 1-14, and 16-29, drawn to a method of comparing tag arrays of different DNA sequence databases and computers and programs on computer readable media that perform the method, classified in class 702, subclass 20.
 2. Claims 15, 30, and 38, drawn to methods of removing repeated sequences from a DNA database and computers and programs on computer readable media for performing the method classified in class 702, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions 1 and 2 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to methods with different steps that produce different results.
3. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Philip Jones on 23 August 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
